Opis produktu

Miata Mx5 NC superlight flywheel, Hi-grade billet CNC performance flywheel with exchangeable friction plate.

3800-4200g fly wheel (ask for details). You can use it directly with your OEM clutch setup or any P&P set dedicated for the Mx5 NC Miata 6-speed or 5-speed (when using the 6b clutch setup-up!).

Our flywheels guarantee immediate performance increase and throttle response. Work super-efficient with "auto-blip" procedures.
Commonly used and reliable for track-day use.

The optional friction plate ex-change kit is available separately- the shipped setup easily lasts 40000-50000 km road kilometer or 4000-5000 track day kilometers.

Parts are hard anodized: This creates a stronger, more protective layer which prevents the parts of degradation.

Goods, manufactured parts and assembly builds done on order- are not refundable. According to EU law, custom parts are not to be
used on public roads and usage in sport application on your own responsibility. Potential claims are considered only by documented proof of qualified/professional installation.

Produkt posiada dodatkowe opcje:

Spare friction plate: no need , +1 friction plate (+ 430,50 zł)
